

Testimony submitted to March 2, 2015 Public Hearing on DEEP Budget:

I support keeping Kensington Hatchery operational and removing it from the list of cuts proposed in the governor's budget because this hatchery generates more money for our state than it costs, and it provides unique benefits that would be forever lost.

A 2011 study by the CT Center for Economic Analysis at UConn reports that \$38 in economic activity is generated by every \$1 our state spends on natural resources.

Closing Kensington Hatchery would end the brood stock salmon stocking program in CT, and along with it up to 7,000 Atlantic Salmon fishing trips per year. Our successful Seeforellen Brown Trout strain will be lost, as will much of the trophy brown trout and sea run trout programs. Our other two hatcheries are operating at maximum and will be unable to make up for the loss of Kensington's capacity and unique elements such as chilled water capability and uniquely favorable well water. Valuable genetic traits defining Connecticut River salmon will be lost forever.

The award winning *Salmon-in-Schools Program* would be terminated after this school year which would affect 60-70 schools and more than 5,000 Connecticut students each year. Another approximate 5,000 schoolchildren will lose the *Trout in the Classroom Program* due to the need for chilled water, only available at Kensington, during egg development. These very cost-effective educational programs also develop environmental awareness in kids.

Decreased fish stocking will lead to less angler hours realized, less tourism, less revenue for small businesses and therefore less tax and license revenue for CT. The current stocking programs generate roughly 2 million angler hours and approximately \$60 million in revenue. The closing of Kensington would eliminate less than \$195,000 in a multi-billion dollar budget, and would be poor economic policy.

Sincerely,

Bruce J. Rich, President
CT Fly Fisherman's Assoc.
